# NVC Netherlands Packaging Centre

**Packaging is** (the activity of) the temporary integration of an external function and a product to enable the use of the product.

NVC (founded in 1953) is the **association of 500+ companies** worldwide, interested in packaging.

The NVC membership, innovation projects, business information services and education programme **stimulate the continuous improvement of packaging, including the responsible disposal of the emptied packs.**

NVC NETHERLANDS PACKAGING CENTRE

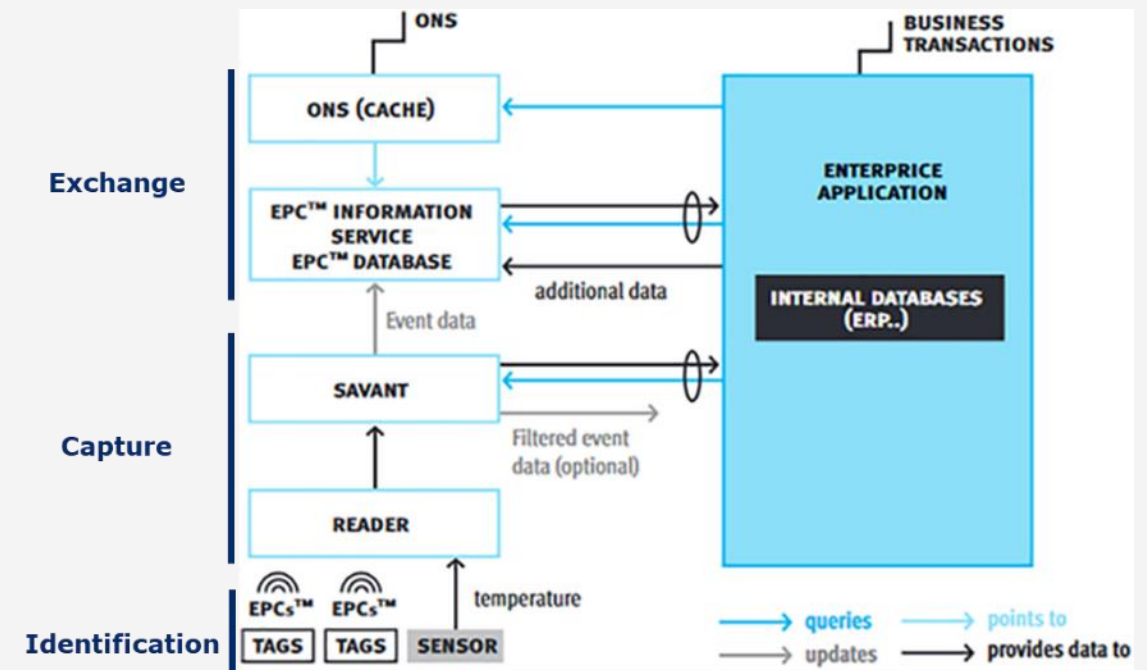

NVC NETHERLANDS PACKAGING CENTRE

## How did NVC and GS1 meet?

**Kevin Ashton**, founder of the term Internet of Things (IoT) in 1999:

“If we had computers that knew everything there was to know about things—using data they gathered without any help from us.

## **NVC-GS1 cooperation in world standards Coding & Identification with RFID (2010)**

ISO 17363, Supply chain applications of RFID – Freight containers

.

**ISO 17364, Supply chain applications of RFID – Returnable transport items**

.

**ISO 17365, Supply chain applications of RFID – Transport units**

.

**ISO 17366, Supply chain applications of RFID – Product packaging**

.

ISO 17367, Supply chain applications of RFID – Product tagging

.

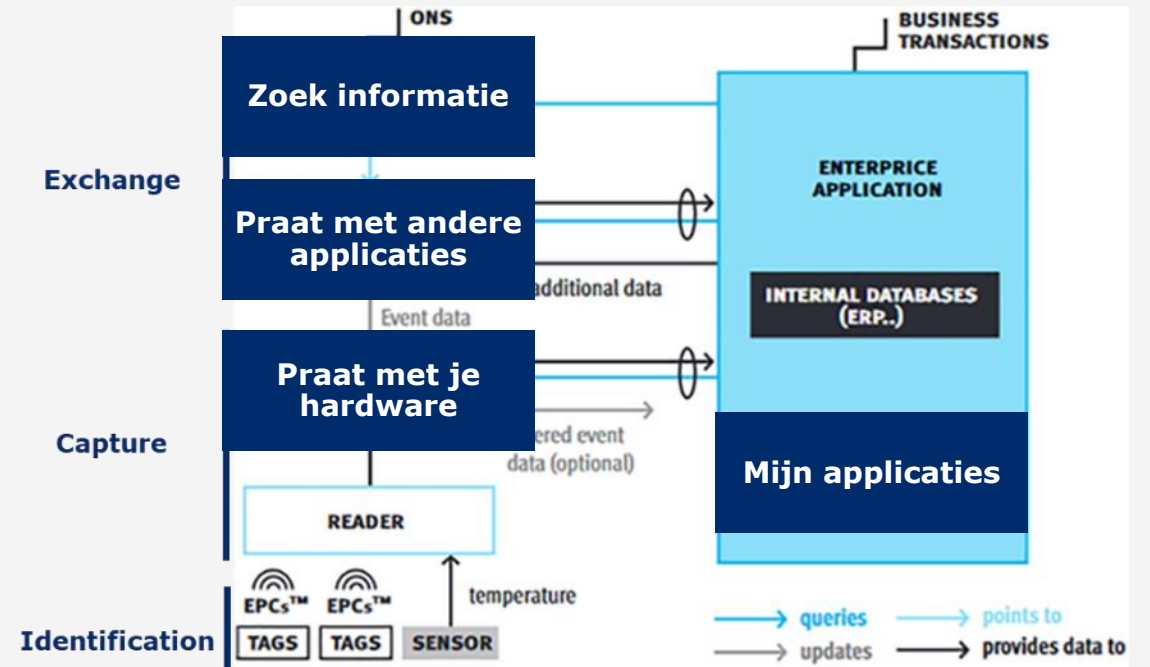

## How did NVC and GS1 meet?

**Kevin Ashton**, founder of the term Internet of Things (IoT) in 1999:

“If we had computers that knew everything there was to know about things—using data they gathered without any help from us—**we would be able to track and count everything, and greatly reduce waste, loss and cost.**”

**We would know when things needed replacing, repairing or recalling, and whether they were fresh or past their best.”**

## New challenges

Eco-Design for Sustainable Products  
Regulation

(ESPR)

Packaging & Packaging Waste  
Regulation

(P&PWR)

## Sustainable Products ESPR – expected Q1 2024

## Packaging & Packaging Waste Regulation PPWR – expected Q1 2024

### DATA

#### Article 7 + JRC study

Information requirements

The PPWR specifies

- Eco-design requirements for packaging
- Information requirements for packaging

If considered necessary, additional information requirements can be mandated by Delegated act.

- Eco-designed packaging
- Made for re-usability
- Made of recycled product
- Easy to be recycled
- No substances of concern

Intermediates (Plastics included, not in top priority list)

## DATA SYSTEM

### Article 10

- DPP should be fully **interoperable with other passports** in relation to technical, semantic and organisational aspects not be allowed to sell, re-use or process such data remain available.

The EU has the intention to harmonise data-exchange. This means the PPWR will adapt to the proposed data system of the ESPR

*Things can talk to Things,  
the DPP can talk to another DPP.*

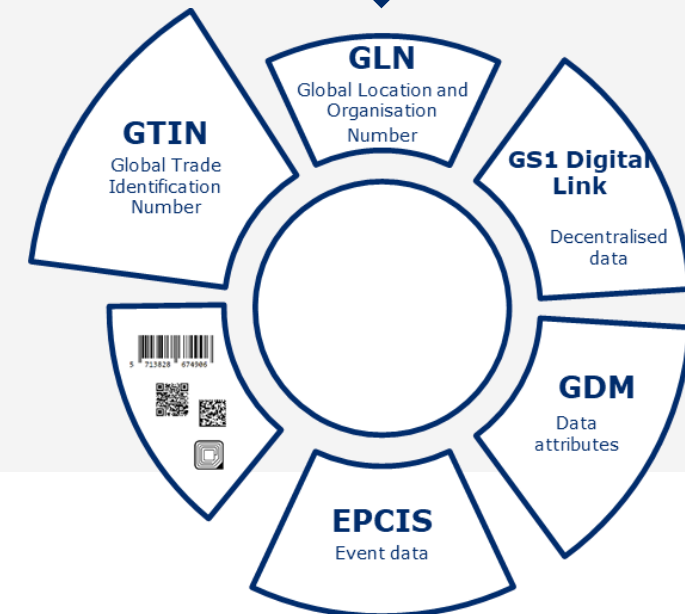

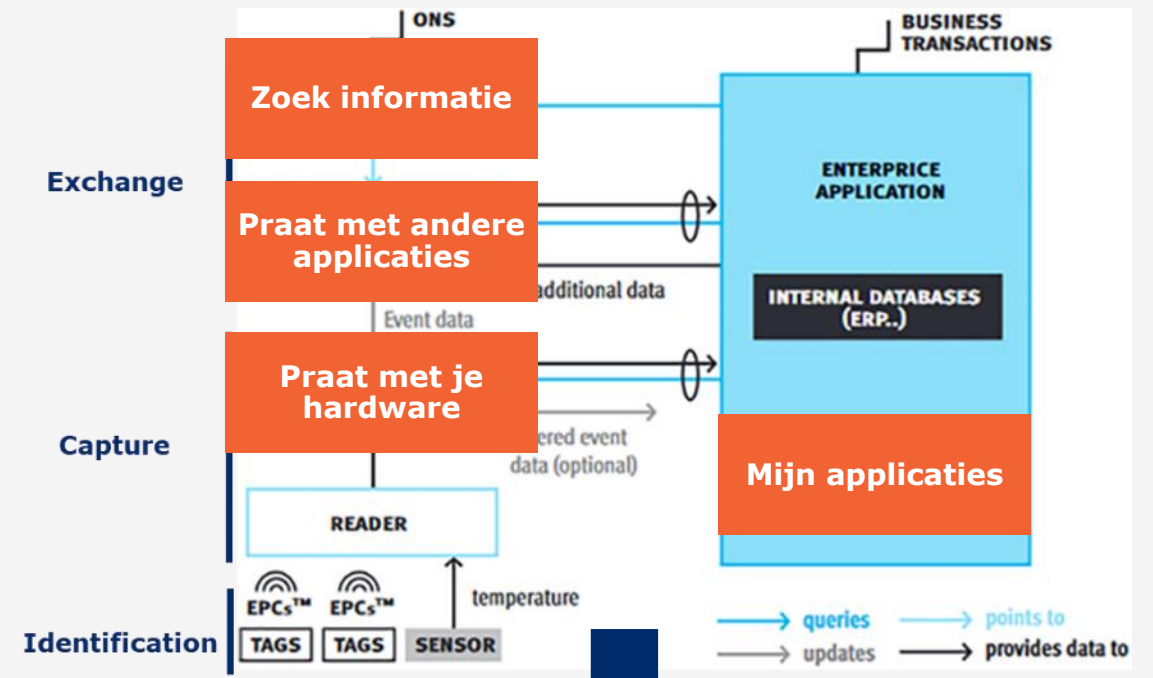

# Sustainable Products

## ESPR – expected Q1 2024

### Article 10

- DPP should be fully **interoperable with other passports** in relation to technical, semantic and organisational aspects not be allowed to sell, re-use or process such data remain available.

***Things can talk to Things,  
the DPP can talk to another DPP.***

# FUTURE ACTIVITIES

**Supporting business with adequate follow-up on the changing regulatory requirements regarding packaging and environment (mainly ESPR – PPWR) by a cross-sector, vertical value-chain**

**Understanding of the complete GS1 architecture, including GS1 Digital Link and EPCIS and applying it to solve the environmental packaging issues (in line with the NVC PUMA Project)**

**Maintain and grow European and worldwide 'eco-system' for open discussion and innovation on how to achieve the required interoperability**

**... let the music play!**
